## RAINFALL DESCRIPTION GUIDE

These descriptions are presented as a guide only since many variables such as terrain, drainage and intensity can alter the descriptions.

**2.5mm** A light rain for 30-45 minutes, moderate rain for 10 minutes or heavy rain for 5 minutes. Small puddles would form but usually disappear after a short while.

**5.0mm** A light rain for 2-3 hours, moderate rain for 30-60 minutes or heavy rain for 15 minutes. Many puddles on the ground that do not disappear easily.

**10.0mm** A light rain never reaches this amount, moderate rain for 1-2 hours or heavy rain for 30-45 minutes. Deep standing water for long periods of time.

**15.0mm** Heavy rain for 1-2 hours – general saturation

**20.0mm** Very heavy rain for 1-2 hours

***Don't let the Weather send your Event Bottom-line South!***
